

# Subject Index

## A

Acarbose, insulin secretion and, 830  
Adenosine triphosphate-sensitive chloride channel, activation of, by cell swelling, cAMP, and glyburide, in insulin-secreting cells, 1461  
Adenylyl cyclase, galanin inhibition of, G<sub>i</sub>-protein and, 453  
Adipocyte, insulin action in, BRL 49653 and, 1087  
Adipose tissue  
  abdominal, in NIDDM, 141  
  human *obese* gene expression in, 855  
Adrenergic cardiac innervation, in IDDM, myocardial iodobenzylguanidine scintigraphy of, 543  
Advanced glycosylation end products, renal and retinal microangiopathy and, 824  
Aging  
  insulin receptor mRNA splicing and, 1196  
  skeletal muscle GLUT4 and, 555  
Albuminuria, as predictor of mortality, in NIDDM, 1303  
Aldose reductase gene, retinopathy and, 727  
Aminoguanidine, diabetes onset and, in BB rat, 360  
Angiotensin I-converting enzyme gene, retinopathy and nephropathy and, in IDDM, 489  
Anticoagulant response, to activated protein C, in IDDM, 1033  
Antigen 512, pancreatic  $\beta$ -cell antibodies to, 1290  
Aorta, vascular endothelial growth factor receptors on, 98  
Apolipoprotein A-I, interstitial, diabetic nephropathy and, 501  
Apolipoprotein B, in IDDM, 1218  
Apolipoprotein E, overexpression of, diabetic hyperlipidemia and, 580  
Apoptosis  
  in endothelial cell, glucose-triggered, 1323  
  of pancreatic  $\beta$ -cell, nitric oxide and, 733  
Athlete, with IDDM, metabolism in, 471  
Autoimmune diabetes  
  adoptive transfer of, *Emv30<sup>null</sup>* NOD-*scid* mouse as host for, 1392  
  cytotoxic T-cell destruction of  $\beta$ -cells in, intercellular adhesion molecule 1 and, 744  
  intrathymic antigen effects on CD8<sup>+</sup> T-cell in, 871  
  in NOD mouse, heat shock protein 60 peptide p277 for, 1132  
  T-cell repertoire in, 354  
Autoimmunity  
  in identical twins with IDDM, 1176  
  thymus and, in BB rat, 963  
Autoregulation, in retinopathy, 603

## B

BB rat  
  diabetes onset in, nitric oxide and, 360  
  hypoglycemia in, brainstem dysfunction in, 900  
  peroxovanadium compounds in, hypoglycemic effects of, 1274

thymus and autoimmunity in, 963  
BB/E rat, diabetes onset in, nitric oxide and, 365

Birth weight, nephropathy and, 1405

Blood flow  
  in leg  
    glucose uptake and, 1165  
    in NIDDM, 221  
  in retinopathy, 603

Blood pressure, ambulatory, in nephropathy, 783. *See also* Hypertension

Blood-brain barrier, GLUT1 in, in chronic hypoglycemia, 1399

Body weight  
  changes in, NIDDM and, 261  
  insulin resistance and, 641

Bone, loss and turnover of, 775

Brainstem dysfunction, in hypoglycemia, in BB rat, 900

## C

Calcium  
  in  $\beta$ -cell  
    fetal, insulin secretagogue stimulation of, 118

  ketooisocaproate-induced oscillations in, 300

  in  $\beta$ TC3-cell, glucagon-like peptide 1 and, 767  
  glucose transport dependent on, in skeletal muscle, in hyperglycemia, 1345

Capillary permeability, in skin and retina, IGF-I and, 1209

Captopril, glucose and lipid metabolism and, in NIDDM patient with hypertension, 665

Carbohydrate metabolism  
  exercise and, 1066  
  during insulin deficiency, effects of epinephrine and cortisol on, 672  
  in sciatic nerve, peripheral neuropathy and, 190

Cardiac innervation, adrenergic, in IDDM, myocardial iodobenzylguanidine scintigraphy of, 543

Cardiovascular disease, common soil hypothesis of, 369

CCAAT/enhancer-binding protein  $\beta$ , hepatic expression of, insulin inhibition of, 267

CD8<sup>+</sup> T-cell  
  aberrant activation of, in newly diagnosed IDDM, 1414  
  intrathymic antigen effects on, 871

Chemokine genes, and T-cell unresponsiveness to chromosome 11, 614

Child  
  IDDM in  
    IgG antibodies to bovine serum albumin in, 1349

  and maternal enteroviral infection during pregnancy, 408

of IDDM parent, IDDM risk in, 295

Chloride channel, ATP-sensitive, activation of, by cell swelling, cAMP, and glyburide, in insulin-secreting cells, 1461

Cholesterol, in IDDM, 1218

Cholestrylo ester transfer, effect of hydroxymethylglutaryl coenzyme A reductase inhibitor on, in NIDDM, 460

Cobalt(III)-insulin, action profile of, 1381

Collagenase, classes I and II, islet isolation with, 227

Corticosterone, regulation of IGF-I, IGFBPs, and growth by, in streptozotocin-induced diabetes, 1420

Cortisol, carbohydrate metabolism and, during insulin deficiency, 672

Coxsackie B viral infection IDDM pathogenesis and, 652

## C-peptide

$\beta$ -cell sensitivity and, 845  
  retinopathy and, 796

Cyclic adenosine monophosphate, activation of ATP-sensitive Cl<sup>-</sup> channel by, in insulin-secreting cells, 1461

Cytokine, nitric oxide synthase inducible by, cloning of, from islets of Langerhans, 753

Cytokine network, insulin injection in, 859

Cytotoxic T-cell, destruction of  $\beta$ -cells by, intercellular adhesion molecule 1 and, 744

## D

Dexamethasone, glucose transport and, 441

*Diabetes* journal (editorial), 1351

Diabetic complications. *See specific disorder*

DNA, mutations in, in diabetes-associated teratogenesis, 20

Doxazocin, glucose and lipid metabolism and, in NIDDM patient with hypertension, 665

DQB1\*0602, protection against IDDM by, 608

DRB1\*0403, protection against IDDM by, 527

## E

Elderly

  insulin and hypoglycemia in, 272

  retinopathy, glucose and insulin in, 11

Embryogenesis, glutathione depletion and oxidative stress and, 992

Embryopathy, maternal diabetes-associated, TNF- $\alpha$  in, 531

*Emv30<sup>null</sup>* NOD-*scid* mouse, as host for adoptive transfer of autoimmune diabetes, 1392

Endoskeletal protein, mRNA encoding, in experimental diabetes, 25

Endothelial cell  
  glucose-triggered apoptosis in, 1323  
  oxidative stress to, 520

Endothelial dysfunction  
  microalbuminuria after, 561  
  pancreatic islet transplantation for, 1106

Endothelin-1, obesity and, 431

Energy metabolism, in sciatic nerve, peripheral neuropathy and, 190

Enteroviral infection

  IDDM pathogenesis and, 408, 652

  maternal, in pregnancy, offspring IDDM and, 408

Epinephrine, and carbohydrate metabolism during insulin deficiency, 672

**E**

Exercise  
insulin secretion induced by, islet transplantation and, 565  
lipid and carbohydrate metabolism and, 1066

Experimental diabetes  
endothelial dysfunction in, pancreatic islet transplantation for, 1106  
neuronal gene expression in, 25  
Extracellular matrix components, glomerular, FR139317 effect on, 895

**F**

Familial NIDDM  
insulin resistance in, 1259  
obesity in, 418

Fasting, insulin receptor mRNA splicing and, 1196

Fat  
brown, reduced, in transgenic mice with NIDDM, insulin resistance in, 1266  
infusion of, insulin secretion and glucose utilization and, 1239

Fatty acid(s)  
hepatic glucose output and, 1038  
myocardial glucose uptake and, in IDDM, 537

Fatty acid-binding protein, intestinal, linkage of, with 2-h insulin, 1046

Fetus,  $\beta$ -cell of, calcium in, insulin secretagogue stimulation of, 118

Fibronectin, mesangial cell synthesis of, thromboxane and, TGF- $\beta$  and, 335

FR139317, effect of, on glomerular extracellular matrix components and growth factors, 895

**G**

Galanin, adenylyl cyclase inhibition by, G-protein and, 453

Gender, insulin sensitivity and, 31

Gestational diabetes  
insulin secretion and action after, 506  
 $K^{ATP}$  channel-like protein in, insulin secretion and, 597  
prediction of NIDDM after, 586  
proinsulin in, 911

GK-Wistar hybrid rat, hyperglycemia in, 1280

Glipizide/insulin, for sulfonylurea failure, 165

Glomerular mesangial cell, contractility of, 759

Glomerulopathy, extracellular matrix and growth factors in, FR139317 effect on, 895

Glucagon, hepatic glycogenolysis in response to, 185

Glucagon-like peptide I  
degradation of, 1126  
glucose disposition and, 1433  
reduction of postprandial glycemic excursions by, 626  
 $\beta$ TC3-cell calcium and, 767

Glucagon-like peptide I (7-36), in Zucker rat, insulin secretion and, 495

Glucagon-like peptide I receptor antagonist, incretin effect and, 16

Glucan-1,4- $\alpha$ -glucosidase activity, acarbose and, 830

Glucocorticoids, insulin resistance induced by, 441

Glucosamine, glycogen synthase regulation by, 314

Glucose  
apoptosis triggered by, in endothelial cell, 1323

disposition of, glucagon-like peptide I and, 1433  
in elderly, 11

glycogen synthase regulation by, 314

hepatic output of, free fatty acid and, 1038

impaired oxidation of, after oxidative stress to endothelial cell, 520

implantable sensor for, 1005

insensitivity to, palmitate-induced, in pancreatic  $\beta$ -cell, pyruvate dehydrogenase kinase and, 394

kinetics of, insulin sensitivity and, 954

metabolism of  
effects of captopril, nifedipine, and doxazosin on, in NIDDM patient with hypertension, 665

fat infusion and, 1239

in insulinoma patient, 837

in skeletal muscle, 936

phosphorylation of, hexokinase II gene regulation and, 1426

reduction of degradative enzymes by, in mesangial cell, 929

tyrosine phosphorylation induced by, in  $\beta$ TC3-cell, 802

Glucose tolerance test  
C-peptide data from,  $\beta$ -cell sensitivity and, 845

early postpartum, 586

intravenous, HLA and, in islet cell antibody-positive siblings, 1021

Glucose transport  
 $Ca^{2+}$ -dependent, in skeletal muscle, in hyperglycemia, 1345

dexamethasone and, 441

in insulin-resistant skeletal muscle  
effects of okadaic acid, vanadate, and phenylarsine oxide on, 682

hypoxia and, 695

in skeletal muscle, after oral glucose load, 1362

Glucose uptake  
blood flow in leg and, 1165

in contracting skeletal muscle, 210

myocardial, hyperglycemia and, 537

Glucose-dependent insulinotropic polypeptide receptor, in human pancreatic islet, chromosomal localization of, 1202

GLUT1, in blood-brain barrier, in chronic hypoglycemia, 1399

GLUT2  
in  $\beta$ -cell, with and without NIDDM, 1369  
loss of, in transplanted islets, 75

GLUT4  
hyperglycemia-induced translocation of, in skeletal muscle, 646

in skeletal muscle, aging and, 555

Glutamic acid decarboxylase antibodies, 1290

disease sensitivity and specificity of, 52  
assays for, 636

identification of, 216

Glutamine:fructose-6-amidotransferase, glycogen synthase regulation by, 314

Glutathione, depletion of, embryogenesis and, 992

Glyburide, activation of ATP-sensitive  $Cl^-$  channel by, in insulin-secreting cells, 1461

Glycemic control, poor, as predictor of mortality, in NIDDM, 1303

Glycemic excursion, postprandial, glucagon-like peptide I and, 626

Glycemic exposure, retinopathy and, 968

Glycogen synthase  
hexosamine regulation of, 314

in skeletal muscle, 1099

Glycogenolysis, hepatic, in response to glucagon, 185

G-protein. *See* Protein(s)

Granzyme A, after T-cell transfer, 112

Growth, corticosterone regulation of, in streptozotocin-induced diabetes, 1420

Growth factor(s)  
 $\beta$ -cell proliferation and, 1458

glomerular, FR139317 effect on, 895

Growth-associated protein, mRNA encoding, in experimental diabetes, 25

**H**

$HbA_{1c}$ , retinopathy and, 968

Heart  
diabetic, intracellular pH and, 196

insulin sensitivity in, gender and, 31

Heat shock protein 60 peptide p277, for autoimmune diabetes, in NOD mouse, 1132

Hexokinase  
amino acid substitutions in, in NIDDM, 330, 340, 347

genetic structure of, 290

glucose phosphorylation and, 1426

in isolated pancreatic  $\beta$ -cell, 1328

Hexosamine  
regulation of glycogen synthase by, 314

synthesis pathway for, in muscle and liver, effects of diabetes and hyperglycemia on, 1438

Hexose monophosphate shunt, in hyperglycemic lens, 810

Hirata's disease, immunogenetic determinants of, 1227

HLA-DQB1\*0602, protection against IDDM by, 608

HLA-DRB1\*0403, protection against IDDM by, 527

HOXD8 locus, linkage of, to IDDM, 132

Human leukocyte antigen  
intravenous glucose tolerance tests and, in islet cell antibody-positive siblings, 1021

physical property changes and, 125

retinopathy and, 1334

Hydroperoxide, plasma levels of, in NIDDM, 1054

12-Hydroxyeicosatetraenoic acid, renin response to, 321

Hyperglycemia  
acute, GLUT4 translocation induced by, in skeletal muscle, 646

in GK-Wistar hybrid rat, 1280

lens in, hexose monophosphate shunt in, 810

and muscle and liver hexosamine synthesis pathway, 1438

renal transport and, 446

short-term, hypoglycemia after, 513

skeletal muscle  $Ca^{2+}$ -dependent glucose transport in, 1345

thrombin formation induced by, oxidative stress and, 924

Hyperinsulinemia  
hepatic apolipoprotein B-100 secretion and, in NIDDM, 1059

protein and glucose metabolism in, in insulinoma patient, 837

Hyperlipidemia, apolipoprotein E overexpression and, 580

Hyperphagia, CNS insulin infusion and, 147

Hypertension. *See also* Blood pressure

with NIDDM, glucose and lipid metabolism in, effects of captopril, nifedipine, and doxazocin on, 665

Hypertriglyceridemia, NO-1886 for, in streptozotocin-induced diabetes, 414

Hypoglycemia  
brainstem dysfunction in, in BB rat, 900  
chronic, blood-brain barrier GLUT1 in, 1399  
counterregulation of, in skeletal muscle, 423  
in elderly, 272  
human insulin in, 257  
peroxovanadium compounds and, in BB rat, 1274  
after short-term hyperglycemia, 513

Hypothalamus, ventromedial, in counterregulation, 180

**I**

IDDM  
activated protein C response in, 1033  
adrenergic cardiac innervation in, myocardial iodobenzylguanidine scintigraphy of, 543  
angiotensin I-converting enzyme gene in, retinopathy and nephropathy and, 489  
in athletes, metabolism in, 471  
β-cell granule antigens in, T-cell responses to, 278  
in child  
effect of maternal enteroviral infection during pregnancy on, 408  
IgG antibodies to bovine serum albumin in, 1349  
parental IDDM and, 295  
DQB1\*0602 protection against, 608  
DRB1\*0403 protection against, 527  
HLA-DQ variations in, physical property changes and, 125  
HOXD8 locus and, 132  
identical twins with, autoimmunity in, 1176  
immunogenetic determinants of, 1029  
insulin gene mapping in, 620  
intravenous insulin as protection against, in NOD mouse, 906  
levels of lipoprotein(a), apolipoprotein B, and cholesterol in, 1218  
lipid and carbohydrate metabolism in, exercise and, 1066  
microalbuminuria in, after endothelial dysfunction, 561  
myocardial glucose uptake and, 537  
nephropathy in  
incidence of, 739  
interstitial apolipoprotein A-I and, 501  
newly diagnosed, aberrant activation of CD8<sup>+</sup> T-cell in, 1414  
in NOD mouse, genetic heterogeneity of, 1186  
pancreatic interferon in, 658  
pathogenesis of, enteroviral infection and, 408, 652  
positional cloning in, 139  
postprandial glycemic excursions in, glucagon-like peptide I and, 626  
postprandial proteolysis in, 203  
prevention of, 859  
recent-onset, platelet activation in, 890  
transfer of, to NOD mouse, by islet-infiltrating lymphocyte, 550

Identical twins, with IDDM, autoimmunity in, 1176

IFN. *See* Interferon

IGF-I. *See* Insulin-like growth factor I

IGFBPs. *See* Insulin-like growth factor-binding proteins

IL. *See* Interleukin

Immunogenetic determinants, IDDM predictability and, 1029

Immunoglobulin G antibodies, to bovine serum albumin, in child with IDDM, 1349

Implantable glucose sensor, 1005

Incretin, glucagon-like peptide 1 receptor antagonist and, 16

Inositol transport, hyperglycemia and, in renal tubule cells, 446

Insulin  
antilipolytic effect of, phosphodiesterase III and, 1170  
in elderly, 11, 272  
human, in hypoglycemia, 257  
injection of, into cytokine network, 859  
intracerebroventricular infusion of, diabetic hyperphagia and, 147  
intravenous, as protection against IDDM, in NOD mouse, 906  
myocardial glucose uptake and, in IDDM, 537  
in nondiabetic offspring of diabetic parent, 1156  
*ob* gene and, 1467  
platelet antiaggregating effect induced by, in obesity and NIDDM, 1318  
two-hour  
linkage of intestinal fatty acid-binding protein with, 1046  
segregation analysis of, 284  
vasodilation and sympathoexcitation induced by, in skeletal muscle, 641

Insulin action  
BRL 49653 and, 1087  
in contracting skeletal muscle, 210  
after gestational diabetes, 506  
physical training and, 1010  
on protein and glucose metabolism, in insulinoma patient, 837  
rate-limiting steps of, 947  
in skeletal muscle, 936

Insulin autoimmune syndrome, monoclonal and polyclonal, immunogenetic determinants of, 1227

Insulin deficiency, carbohydrate metabolism in, effects of epinephrine and cortisol on, 672

Insulin gene  
exact length of 5'-flanking polymorphism class 1 alleles in, 1296  
mapping of, 620

Insulin gene promoter, nomenclature in, 1002

Insulin receptor  
genetic regulation of, effects of fasting, aging, and diabetes on, 1196  
mutations in, in NIDDM, 1081

Insulin receptor kinase, in skeletal muscle, in NIDDM, 1310

Insulin resistance  
in familial NIDDM, 1259  
glucocorticoid-induced, 441  
hexokinase II in, 43, 340, 347  
hyperglycemia-induced, hypoglycemia pathogenesis and, 513  
increased, as NIDDM risk factor, 1386  
in lean patient, 641  
obesity and, 1121  
in skeletal muscle  
antiglucocorticoids and, 718  
2-deoxyglucose transport in, effects of okadaic acid, vanadate, and phenylarsine oxide on, 682

glucose transport in, hypoxia and, 695  
in transgenic mice with reduced brown fat, 1266

Insulin response, acute  
chromosome 1p and, 478  
defect in, insulin secretion and, 984

Insulin secretagogue, fetal β-cell calcium and, 118

Insulin secretion  
acarbose and, 830  
decreased, as NIDDM risk factor, 1386  
defect in, insulin resistance and, 984  
exercise-induced, islet transplantation and, 565  
fat infusion and, 1239  
after gestational diabetes, 506  
glucagon-like peptide I (7-36) and, in Zucker rat, 495  
 $K_{ATP}$  channel-like protein and, 592, 597  
in maturity-onset diabetes of the young, genetic defect and, 699  
in pancreatic β-cell,  $H_2O_2$ -induced activation of  $K_{ATP}$  channel and, 878  
from pancreatic β-cell, monitoring of, 1213

Insulin sensitivity  
gender and, 31  
glucose and lactate kinetics and, 954  
minimal model analysis and isoglycemic clamp of, 631

Insulinitis, induction of, in nude mouse, 49

Insulin-like growth factor I  
corticosterone regulation of, in streptozotocin-induced diabetes, 1420  
effect of, on capillary permeability in skin and retina, 1209  
retinopathy and, 161

Insulin-like growth factor-binding proteins, corticosterone regulation of, in streptozotocin-induced diabetes, 1420

Insulinoma, protein and glucose metabolism in, 837

Insulin-stimulated protein kinase, genetics of, in NIDDM, 90

Intercellular adhesion molecule 1, on pancreatic β-cell, and cytotoxic T-cell destruction of β-cells, 744

Interferon, pancreatic, in IDDM, 658

Interferon-γ, antibody to, functions of, in adult pancreas, 1161

Interleukin-1β, islet protein synthesis and, 400

Interleukin-6, hybridization of, in nephropathy, 1233

Intestinal fatty acid-binding protein, linkage of, with 2-h insulin, 1046

Intrathymic antigen, effects of on CD8<sup>+</sup> T-cell, 871

Islet cell. *See* Pancreatic β-cell

Islet cell antibody-positive siblings, HLA and intravenous glucose tolerance tests in, 1021

Islet cell antigen 512 autoantibody, radioassay for, 1340

Islet-1 screening, in NIDDM, 689

Islets of Langerhans, cloning of  
cytokine-inducible nitric oxide synthase from, 753

**K**

Kallikrein, renal, hyperfiltration and, 156

$K_{ATP}$  channel,  $H_2O_2$ -induced activation of, insulin secretion and, in pancreatic β-cell, 878

$K_{ATP}$  channel-like protein, insulin secretion and, 592, 597

Ketoacidosis, obesity and, 790

Ketoisocaproate, calcium oscillations and, in pancreatic  $\beta$ -cell, 300  
 Kidney, diabetic, TGF- $\beta$  in, 1139  
 Kinin, renal hyperfiltration and, 156

**L**  
 L-686,398, action mechanisms of, 47  
 Lactate kinetics, insulin sensitivity and, 954  
 Leg, blood flow in  
   glucose uptake and, 1165  
   in NIDDM, 221  
 Lens, hyperglycemic, hexose monophosphate shunt in, 810  
 Lipid metabolism  
   effects of captopril, nifedipine, and doxazocin on, in NIDDM patient with hypertension, 665  
   exercise and, 1066  
 Lipoprotein(s)  
   effect of hydroxymethylglutaryl coenzyme A reductase inhibitor on, in NIDDM, 460  
   low density  
     oxidation of, in NIDDM, 60  
     subfractions of, 1093  
 Lipoprotein(a), in IDDM, 1218  
 Lipotoxicity, in obesity-dependent NIDDM, 863  
 Liver  
   apolipoprotein B-100 secretion in, hyperinsulinemia and, in NIDDM, 1059  
   CCAAT/enhancer-binding protein  $\beta$  expression in, insulin inhibition of, 267  
   glucose output of, free fatty acid and, 1038  
   glycogenolysis in, in response to glucagon, 185  
   hexosamine synthesis pathway in, effects of diabetes and hyperglycemia on, 1438  
 Lymphocyte, islet-infiltrating, transfer of diabetes by, 550  
 Lymphohematopoietic cell, growth of, in *Emv30<sup>null</sup>* NOD-*scid* mouse, 1392

**M**  
 Major histocompatibility complex I, class I, in NOD mouse, 572, 1114  
 MAP. *See* Mitogen-activated protein kinase  
 Maternal diabetes, embryopathy and, TNF- $\alpha$  in, 531  
 Maternity-onset diabetes of the young  
   K<sub>ATP</sub> channel-like protein in, insulin secretion and, 597  
   locus for, in NIDDM, 1243  
 Mesangial cell  
   degradative enzymes in, glucose reduction of, 929  
   fibronectin synthesis in, thromboxane and, TGF- $\beta$  and, 335  
   glomerular, contractility of, 759  
 Metabolism, in athlete with IDDM, 471  
 MHC. *See* Major histocompatibility complex  
 Microalbuminuria, after endothelial dysfunction, 561  
 Microangiopathy, advanced glycosylation end products and, 824  
 Microvascular function, physiology of, 721  
 Mitogen-activated protein kinase, in skeletal muscle, vanadium and, 1147  
 MODY gene  
   insulin secretory defects in, 699  
   localization of, 1408  
 N<sup>G</sup>-Monomethylarginine, diabetes onset and, in BB rat, 360

Mortality prediction, in NIDDM, albuminuria and glycemic control in, 1303  
 mRNA, encoding endoskeletal and growth-associated proteins, in experimental diabetes, 25  
 Muscle, hexosamine synthesis pathway in, effects of diabetes and hyperglycemia on, 1438

**N**  
 NADPH supply, after oxidative stress to endothelial cell, 520  
 Na<sup>+</sup>/H<sup>+</sup> exchanger, phosphorylation and activity of, in nephropathy, 1180  
 Na<sup>+</sup>/K<sup>+</sup> exchanger, turnover of, glucose and, 382  
 Na<sup>+</sup>-K<sup>+</sup>-ATPase, hyperglycemia and, in renal tubule cells, 446  
 Nephropathy  
   ambulatory blood pressure in, 783  
   angiotensin I-converting enzyme gene and, 489  
   birth weight and, 1405  
   IL-6 hybridization in, 1233  
   incidence of, 739  
   interstitial apolipoprotein A-I and, 501  
   Na<sup>+</sup>/H<sup>+</sup> exchanger phosphorylation and activity in, 1180  
   Na<sup>+</sup>/K<sup>+</sup> exchanger turnover in, glucose and, 382  
 Neuronal gene expression, in experimental diabetes, 25  
 Neuropathy  
   clinical trials in, 1355  
   peripheral, carbohydrate and energy metabolism in sciatic nerve and, 190  
   sorbitol dehydrogenase inhibition and, 234
